EXPENDITURES OF SCHOOLS OF PUBLIC HEALTH

1. University Funds 98
2. Grants and Contracts 99
3. Total Expenditures 99

PREFACE

Schools of Public Health have been educating professionals in the techniques of health preservation and disease prevention and control since the first decades of the twentieth century. Some Schools of Public Health had their beginnings in university schools of medicine; others were conceived from the outset as autonomous units within their parent institutions. Today there are twenty-two fully accredited Schools of Public Health in the United States, at eight private and fourteen public universities.*

Unlike other health professional schools which emphasize a specific clinical discipline (for example, medicine, nursing or dentistry), Schools of Public Health educate a wide range of professionals, from biostatisticians and epidemiologists to health administrators, community health educators, and specialists in areas such as environmental and occupational health, mental health, population studies, international health and the behavioral and social sciences.

The Schools have a combined enrollment of about 9,000 students and a faculty in excess of 1,700. Graduate education in each of the 22 Schools is organized around nine major specialties:

- Biostatistics
- Epidemiology
- Health Services Administration
- Public Health Practice and Program Management
- Health Education
- Environmental Sciences
- Occupational Safety and Health
- Nutrition
- Biomedical and Laboratory Sciences

Graduates of the Schools of Public Health work primarily in the fields of health promotion and disease prevention. They represent the basic resource pool from which federal, state and local health and environmental agencies draw their manpower needs. Graduates also work and teach in university settings. Industry relies heavily on the Schools to train employees involved in industrial hygiene, occupational safety and health, environmental toxicology, and other areas.

---

*University of Alabama in Birmingham, Boston University, University of California-Berkeley, University of California-Los Angeles, Columbia University, Harvard University, University of Hawaii, University of Illinois, The Johns Hopkins University, University of Loma Linda, University of Massachusetts, University of Michigan, University of Minnesota, University of North Carolina, University of Oklahoma, University of Pittsburgh, University of Puerto Rico, University of South Carolina, University of Texas, Tulane University, University of Washington and Yale University. San Diego State University will seek full accreditation in 1983.

The Association of Schools of Public Health (ASPH)* operates a Data Center that collects and compiles aggregate data on applicants, students, graduates, faculty, educational costs and programs in each School of Public Health. The data collected serves the Schools and various federal, state and local agencies and private institutions in planning and implementing their respective public health training, research and service activities. ASPH has also developed the capacity to provide timely information on the status of the Schools of Public Health and the contribution of its students, faculty and graduates.

This report presents data collected by the ASPH staff for the 1981-82 school year. By agreement of the Deans of the Schools of Public Health, only data in the aggregate was collected and no attempt has been made to analyze the information. This report is designed to assist the Deans, staff and faculty in their efforts to develop and maintain relevant academic public health educational programs. This report also provides information that contributes to an understanding of each School's resources which, in turn, will guide the direction and substance of their graduate public health education, training and research endeavors.

The ASPH Data Committee hopes that the information contained in this report proves useful in providing the Deans with data needed to respond to emerging needs and to offer a balanced curriculum in public health, disease prevention and health promotion.

Nicholas Parlette
Associate Dean
University of California-
Berkeley, and
Chairman, ASPH Data Committee

Robert Moorehead

Jeanne Morrow
Director, Evaluation Services
Johns Hopkins University

September 1982

---

*The Association of Schools of Public Health (ASPH) is the only national organization representing the Deans, faculty and students of the 22 Schools of Public Health. The Schools represent the primary education system that trains personnel needed to operate our nation's public health, disease prevention and health promotion programs. ASPH's principal purpose is to promote and improve the education and training of professional public health personnel. ASPH represents all the Schools of Public Health in the United States.

ACKNOWLEDGMENTS

ASPH is indebted to the Deans of the Schools of Public Health who provided support and assistance to the staff during the development of this report. Our greatest debt belongs to the principal Data Center liaisons from the Schools who contributed their time to provide us with the data without which this report could not have been completed:

Dean William F. Bridgers

FOOTNOTES FOR
ENROLLED STUDENTS' AREA OF SPECIALIZATION TABLES
PAGES 44-48

[1] Includes Biostatistics and Epidemiology.

[2] Total includes students with dual concentrations.

Total Enrollment is:	U.S.	228
	Foreign	9
		237

[3] Includes Envir. Science & Occ. Safety & Health.

[4] Includes MPH students who were not required to declare specialty area.

[5] Includes Community Health Practice and Health Services Organization.

[6] Includes Nutrition and Population Studies.

[7] Includes 41 undergraduates.

[8] New enrollments only.
